

# Personalized Welcome Page

A Simple Web Development Project

# Introduction

- This project is a simple web page where:
- Users can enter their name
- On clicking Submit, a personalized message is displayed
- For example: 'Hi Steve, welcome to my page!'

# Technologies Used

- HTML: Structure of input box and button
- CSS: Styling of the page and elements
- JavaScript: Logic to display personalized message

# Features

- ✓ Simple input form
- ✓ Personalized welcome message
- ✓ Clean and professional UI with gradient background
- ✓ Interactive response when user enters name
- ✓ Beginner-friendly project

# Code Structure

- The project is separated into three files:
  - index.html - Input and button
  - style.css - Styling and layout
  - script.js - JavaScript logic
- This ensures clean and professional coding practices.

# Output Demo

- When the user enters a name:
- The page instantly displays a message
- Example: 'Hi John, welcome to my page!'
- This creates a personalized user experience.

# Conclusion

- This project is a beginner-friendly introduction to web development.
- It covers:
  1. HTML forms
  2. CSS styling
  3. JavaScript DOM manipulation
